

Triumph V5 Point of Sale - Released

The long awaited release of Triumph V5 Point of Sale is now reality. Friday the 30th of November 2012 saw the official launch of this exciting new product.

Benefits of Triumph V5 Point of Sale Retail Software

Accounting systems for retail operations now days are far more than just point of sale systems. An integrated retail accounting software system such as Triumph V5 provides a suite of tools designed to make total retail operations more efficient, easier to manage, and more profitable. Triumph V5 has many exciting new features, ready for you to discover. You now even have the ability to run Triumph POS on a virtual server in the cloud. You can now have their sales people out on the road, in the back warehouse, or out from behind the desk and on the selling floor serving customers, while being able to take orders and place sales using an iPad, Android or Windows tablet.

Ease of Use Triumph V5 Point of Sale

With increased capabilities in integrated retail accounting software systems, there is a need to make sure that the software is still easy to use. In Triumph V5 you will find easy to set up wizards, help screens, and simplified touch-screen interfaces making sure that increased functionality doesn't lose its impact by becoming overwhelming. Whilst still providing comprehensive integrated back of house management reporting and accounting that is critical to the success of businesses and their ability to be more efficient and profitable.
